Collaborated Projects:

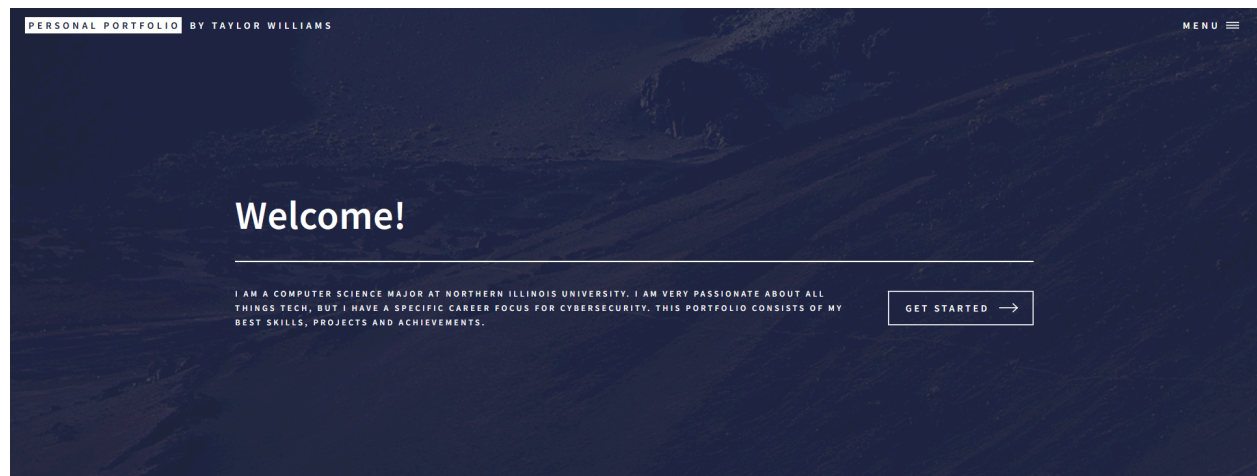

[Air Draw](#)

- Airdraw is a project that was made in Huskie hackers. It tracks finger movements and hand gestures through a webcam, and translates them into drawings on the screen. It has 2 detection modes: color selection, and eraser functionality.
 - Draw: Single index finger
 - Move/select: Index + middle fingers
 - Lift “pen”: two fingers together

Personal Projects:

[Personal Portfolio](#) (Work In progress)

- This portfolio is a compiled collection of my interests, achievements, and projects.

Skillsets

PROGRAMMING LANGUAGES & HOW I'VE USED THEM

Cybersecurity & Networking

SKILLSETS THAT I'VE USED FOR CYBERSECURITY-RELATED WORK
