## **CAREER OBJECTIVE**

After I receive my Master's Degree, I aspire to become a white hat hacker, meaning I will utilize my programming and security knowledge to test the effectiveness of cyber defense algorithms and systems. In the summer of 2024, I participated in the NYLF Engineering program at Georgia Tech, where I had the opportunity to stay on the Georgia Tech campus for a week and engage in various tech/engineering-related activities. For my career path, I plan to earn my bachelor's degree in Computer Science at Northern Illinois University (NIU) and then pursue my master's degree at Georgia Tech.
